Ultra Slim Induction Cooker

Fry & Deep Fry

For high temperature cooking. Time and power are adjustable during cooking. Automatically switches to interval heating when desired temperature is achieved.

Soup & Braise

Automatically adjusts the power according to the pre-set time duration and temperature. Manual power adjustment is possible at any time, and cooker returns to auto power control after 2 minutes. Automatically keeps warm for 2 hours after cooking is completed in 'Soup' mode.

Hot-pot

For hot-pot and boiling water. Time and power are adjustable during cooking. Automatically switches off if the water in the pot dries up or the temperature is abnormally high.

8 Cooking Functions

Fierce Fire

For high temperature cooking. Automatically switches to interval heating when desired temperature is achieved.

Slow Fire

For continuous gentle heating. When cooking soup or congee, please use 'Hot-pot' mode to boil the ingredients first before using this mode. Time duration can be set according to ingredients and personal taste preference.

Boil

For boiling water. The cooker will automatically switch off after 15 minutes. Power cannot be adjusted in this mode.
